**Non Final Office Action**

Claims 1-7 are pending. Claims 1-6 are allowed. Claim 7 is rejected.

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 7 provides for the use of the mixture of compound I and II as in claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 7 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Applicant may re-write the claim according to US Practice.

**Reasons for Allowance**

Claims 1-6 are allowed. Closest prior arts are DE 1,567,169 and GB 857,888. DE reference teaches the fungicidal activity of the propamocarb (compound of formula I in claim 1) and GB reference teaches dithianon as excellent fungicide (compound of formula II in claim 1).

These references neither teach nor suggest synergistic combination of these two fungicides. Specification discloses synergistic combination of these two compounds in Table A
